**WINTER HARDY DOUGLAS FIR**

European Foresters report frost damage to Green Douglas Fir last winter. For affected areas we recommend our British Columbia Shuswap *Pseudotsuga taxifolia caesia*, which was not damaged. It is definitely hardier.

Elevation to 1000 ft. \$8.00 per lb.

**COLORADO DOUGLAS FIR**

Colorado has a good crop of *Pseudotsuga taxifolia glauca*. Seeds from elevation over 5000 ft. \$14.00 per lb.

### TO OUR FLOWER SEED CUSTOMERS

There are but few growers of fine quality flower seed. They are widely known in the trade. In their field they produce a very high percentage of the flower seed used in the United States. Since we also use their seed, we know that our quality is equal to the best.

Our prices are often very much lower because:

- (1) We have no salesmen.
- (2) Our advertising budget is very modest.

Nevertheless, our turnover is growing steadily. Most of our customers not only stay with us from year to year, but they recommend us to their friends.

That is why our business continues to grow.

We wish to express our appreciation to you for the patronage that has been a valuable element in our growth.

F 1 Petunias surpass open polinated strains in uniformity of plant habit, flower size, style, and color. They are also much more floriferous. They can be brought to flower quickly for early pot sales. Their usefulness as specimen plants is outstanding. Their uniform habit makes them delightful border subjects. Their solid profuse flowering habit establishes them as wonderful for bedding.
